

CDH

IS YOUR HOME OR OFFICE PROPERLY VENTILATED

By portabel Air Quality Monitor can you:

- Quickly find areas with low or substandard ventilation.
- Identify hidden energy savings in over-ventilated spaces.
- Determine if ventilation is a factor in air quality complaints.
- Locate and identify the presence of combustion fumes from vehicles and appliances.
- Use as a reference to calibrate wall mounted CO2 sensors.
- Understand your ventilation system and learn how fresh air is distributed... verify it is working as designed
