

- No spring return
- Running time 150 sec
- 10 Nm
- Modulating 2 ... 10 Vcc ??
- Power supply 230V ac, 24V ac, 24V dc
- According to EN 60079-0, EN 60079-1,
- EN 60079-31
- Zones 1, 2, 21, 22

## Applications

The EXNM actuators are intended for the operation of air control damper in ventilation and air condition system up to approx  $2m^2$ .

NEMKO 03 ATEX 1242X II 2G Ex d IIC T6 Gb II 2D Ex tb IIIC T67 °C For zone 1, 2, 21, 22

The product may differ from the illustration

## Features:

Just powered, the actuator moves the damper to its start position, then it moves to the position set by the control signal.

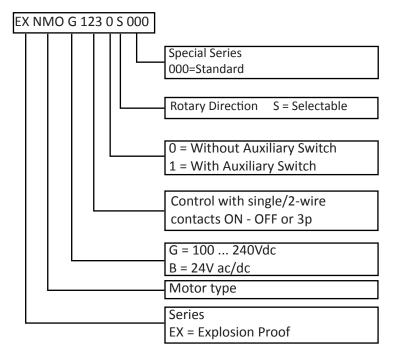

If the control signal is interrupted the motor locks the damper position.

The actuator is overload protected. The actuator can be mounted directly on the damper shaft if square, 12 x 12 mm or 10 x 10 mm (adaptor included); Several mounting brackets are available for applications where the actuator cannot be directly coupled to the damper shaft.

## Product range

| ITEM                 | Auxiliary<br>Switch |
|----------------------|---------------------|
| EXNM 0 G 123 0 S 000 | None                |
| EXNM 0 G 123 1 S 000 | 1 x<br>SPDT         |
| EXNM 0 B 123 0 S 000 | None                |
| EXNM 0 B 123 1 S 000 | 1 x<br>SPDT         |

Micro Switch: 1mA...3A (0,5A) max 250V ac Switching point at 85° if ROTARY direction is "L"

Options available on request:

- Different angle of rotation
- Different wiring length

### **Technical data**

| Torque                | 10 Nm                                                        |
|-----------------------|--------------------------------------------------------------|
| Control Mode          | ON/OFF, 3-ppoint                                             |
| Angle of rotation     | 95°                                                          |
| Running time          | 150 Sec.                                                     |
| Ambient temperature   | -20°C + 50°C                                                 |
| Degree of protection  | IP66                                                         |
| Housing material      | Aluminium baked varnish                                      |
| Maintenance           | None                                                         |
| Fastening             | Terminal block in Ex e box<br>(Optional)                     |
| Wiring length         | 1m cable                                                     |
| Weight                | 4 Kg                                                         |
| EMC                   | CE according to 2004/108/EC                                  |
| Low voltage directive | CE according to 2006/95/EEC                                  |
| Halogen – Free wiring | According to IEC 60332-1/3 and<br>According to IEC 60754-1/2 |

#### NOTE:

- Read the note about the use and torque requirements of the damper manufacturer
- All electrical wirings must be according to local standards.
- Electrical connections by power off only.
- Ex e junction box must not be opened under any circumstances when the power is on.
- Actuator cable must be installed in a fixed position and protected against damage.
- Avoid excessive vibrations.
- Before switching-on, check that no other equipment is damaged and make sure that supply voltage corresponds with the Actuator's specification.
  Before switching-off check for possible effects on
- other equipments.
- The Actuator cannot and is not to be opened to guarantee explosion proof and warranty.
- For any problem contact Automatikprodukter.
- The equipment shall be marked "X" since flameproof joint is other than the relevant minimum or maximum according to CEI EN 60079-1. Information on dimension of flameproof joints available at Automatikprodukter.

## ATTENTION:

The above instructions must be carefully and strictly followed.

Automatikprodukter disclaims any liability whatsoever for any loss caused by not following of the above instructions.

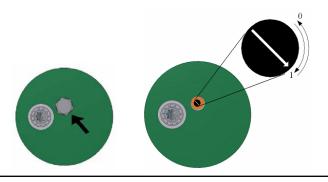

| EXNM G Version          |                            |
|-------------------------|----------------------------|
| Power supply            | 100 240 Vac ± 15% 50/60 Hz |
| Power consump.: running | 2.5 W                      |
| Power consump.: At rest | 0.6 W                      |
| Sizing                  | 6.0 VA                     |

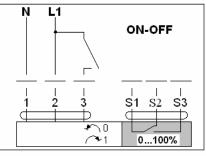

| EXNM B Version          |                       |
|-------------------------|-----------------------|
| Power supply            | 24 Vac ± 20% 50/60 Hz |
|                         | 24 Vdc ± 20%          |
| Power consump.: running | 1.5 W                 |
| Power consump.: At rest | 0.2 W                 |
| Sizing                  | 3.5 VA                |

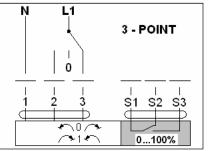

#### Rotary direction

In order to change the rotary direction it is necessary to:

- A. Unscrew cap indicated by the arrow
- B. Rotate the switch as per drawing
- C. Carefully screw cap exerting a slight pressure at the end of the rotation.
